

# BIRGER. CYBER SECURITY SURVEY 2020

## BIRGER. CYIndex 2020

Low maturity: 0 - 50 | Moderate maturity: 51 - 70 | High maturity: above 70

 **291**  
Number of Respondents

 **90%**  
Respondents involved in Cyber Security

 **200**  
Number of Organisations

 **13**  
Number of Countries

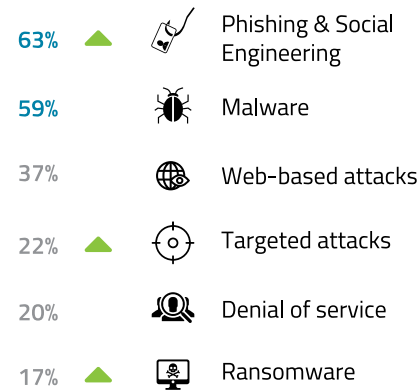

## Attack Surface

As organisations embarked on their digital transformation journey, IT Systems shifted from the traditional contained environment to a more exposed one. The outbreak of Covid-19 pandemic further accelerated this transformation causing the attack surface to be more exposed to cyber-attacks.

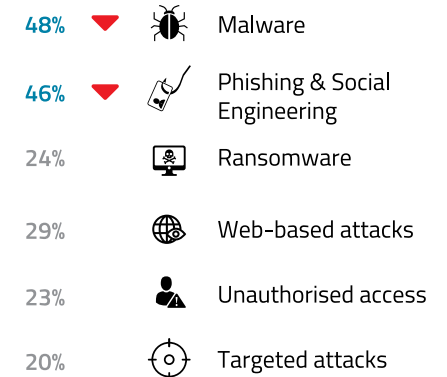

## Incidents

### Africa

### IOI

  Higher or Lower compared to 2019

## Recommendations

  
Awareness

  
Automation

  
Specialised Service providers

## Conclusion

Despite the Cyber Security Maturity level of organisations having increased, there is always room for improvement. Taking into consideration the new reality, organisations need to review and adapt their Cyber Security Strategies to minimise their exposure to attacks.
